
HDATime (HDAT) – Roadmap

Official Document – Version 1.0

1. Overview

The HDATime (HDAT) roadmap outlines the strategic phases of development, expansion, and ecosystem integration.

Each phase is designed to strengthen the project's foundation, increase adoption, and build long-term utility for users and businesses.

2. Phase 1 – Launch

2.1 Token Creation

- Deployment of the HDAT token on BNB Smart Chain (BEP-20)
- Initial configuration and validation of contract parameters

2.2 Branding & Identity

- Creation of the official HDATime brand
- Logo design and visual identity
- Establishment of communication standards

2.3 Documentation

- Publication of the official whitepaper
- Creation of the GitHub repository
- Upload of technical and project documentation

2.4 Contract Verification

- Verification of the smart contract on BSCScan
- Public visibility and transparency of contract details

3. Phase 2 – Expansion

3.1 Exchange Integration

- Listing on PancakeSwap
- Liquidity pool creation
- Initial trading availability

3.2 Wallet & Platform Listings

- Submission to Trust Wallet
- Submission to CoinMarketCap
- Submission to CoinGecko

3.3 Ecosystem Tools

- Development of internal productivity and automation tools
 - Integration of HDAT utilities into early platform features
-

4. Phase 3 – Ecosystem Development

4.1 External Integrations

- Partnerships with digital platforms
- API and smart contract integrations
- Expansion of HDAT utility in third-party environments

4.2 Business Adoption

- Implementation of HDAT as a utility token in service-based workflows
- Onboarding of early business adopters

4.3 Advanced Automation

- Development of advanced automation modules
 - Smart contract-based task management
 - Productivity enhancements
-

5. Phase 4 – Growth & Scaling

5.1 Strategic Partnerships

- Collaboration with technology companies
- Expansion into new markets
- Cross-platform integrations

5.2 Ecosystem Expansion

- New features and tools
 - Additional utility layers
 - Long-term sustainability initiatives
-

6. Conclusion

The HDATime roadmap represents a structured and scalable plan for growth.

Each phase builds upon the previous one, ensuring stability, transparency, and continuous development.

The goal is to establish HDATime as a reliable, efficient, and widely adopted utility token in the global technology ecosystem.
