# 1. What is HDATIME?

HDATIME is the official project name and domain of the Tiempo HDA (HDAT) token. Native token of the HDA Nexus ecosystem, designed under the principle that time is the most valuable asset. HDAT is the verifiable digital asset on BNB Smart Chain that backs the entire ecosystem.

## Purpose

To quantify the value of time. It is not a generic utility token.

It is a scarce asset (1,000,000), costly and exclusive that converts every minute of focus, management and execution into tangible and verifiable value.

## Vision

To be the tokenized time standard applicable to any industry where time is the asset: real estate, transport, logistics, professional services, consulting, education, health, tourism and fleets.

Formula: Transformation + Time + Value + Strategy
